DETAILED ACTION

Applicant's election without traverse of Group I, claims 1-17, in the reply filed on 2/22/05 are acknowledge. It is suggested that non-elected claims 18-49 be canceled in the response to this Office Action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Hokari (US 5,654,565).

With regard to claim 1, Hokari discloses a method of forming a CCD (col. 5, line 16 to col. 10, line 45 and fig. 9) comprising the steps of:

- forming at least one photosensor region (col. 3, lines 33-45 and fig. 9);
- forming a first electrode layer 41 over the substrate 11 in a pixel region (under microlens 71 in fig. 9) and a periphery region (charge transfer region in fig. 9);
- forming a first dielectric layer 31 over the first electrode 41 (fig. 9);
- forming a second dielectric layer 33 over the first dielectric layer 31 (fig. 9); and
- forming a second electrode layer 56 over the second dielectric layer 33 (fig. 9).

With regard to claims 2 and 4, Hokari discloses the first electrode layer 41 and the second electrode layer 56 are formed of a polysilicon material (col. 5, lines 46-47 and col. 10, lines 1-2).

With regard to claim 3, Hokari discloses the first dielectric layer 31 is formed of silicon oxide (col. 5, line 51) and second dielectric layer 33 is formed of silicon nitride (col. 5, line 59).

With regard to claim 5, Hokari discloses the CCD is a photodiode (col. 3, lines 33-45).

With regard to claim 6, Hokari discloses the photodiode is a p-n-p diode (see layer 25, 13, and 21 in fig. 9).

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest either in singly or in combination the following limitations and other elements in the claims:

Reference Hokari does not disclose patterning a second electrode layer in the pixel region and the periphery region, such that one of the pixel region and periphery region comprises the first dielectric layer, and the other of the pixel region and the periphery region comprises both the first dielectric layer and the second dielectric layer.

Therefore, the above references do not disclose the claimed invention of present application and claims 7-17 are allowed.

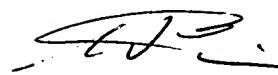

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
